

Wall Mount Distribution Box 2552SA

* Couplings purchased separately

The 3M 2552SA offers excellent fiber management in an affordable box with an attractive, low profile design able to be wall mounted anywhere in your LAN network. The box is also suitable for housing consolidation points.

The 2552SA series brings efficient use of space as well as functionality and rugged durability. The boxes have a unique sliding lid to provide easy access to couplings and fiber management.

Interchangeable connector panels are included to accommodate: ST* simplex & duplex couplings, SC duplex couplings, FC "D-mount" couplings, and LC quadplex couplings. Couplings are purchased separately.

Fibers can either be directly terminated or spliced to pigtails using either Fibrlok™ or fusion splicing. The 2552SA is constructed from flame retardant material and can be mounted to allow left, right, bottom or top entry.

The 2552SA is part of 3M's large family of fiber optic products including connectors, couplings cable assemblies, splices and more.
